

REMARKS

As the Examiner should be aware, this application is part of the Motorola "bulk filing" applications. Special procedures have been approved for these cases with regard to IDSs, etc. Examiner Baumeister and SPEs Chaudry, Lee and Flynn are well aware of this program should the Examiner have any questions. Of course, he may also call the undersigned.

The present claims are not unpatentable over the cited art. In this regard Applicants have met with the above-mentioned Examiner and SPEs to discuss this series of cases and the prior art. As a result of these discussions it was considered that the above amendments to the structure claims would materially advance the prosecution of these cases, leaving only the double patenting rejections. As the double patenting rejections will kindly be held in abeyance, applicant will await the indication of allowable subject matter. In addition, it is to be noted that several of the "Bulk filing" cases have been abandoned.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
